I am off to Seattle this week to meet with our Office of Research and Development folks who will be doing the ecological risk assessment. One of the goals is to establish a more firm time line. I'll let you know when I find out.

And by the way....thanks.

**Subject:** Time Line

Phil,

As mentioned, I was in Juneau-Auke Bay and presented the pebble mine discussion to the Science Center, as outlined on 5/5. Near the end of that presentation, I segued into the current EPA bio-assessment and our role.

I believe I have rallied support on the topic of marine mammals in Bristol Bay, though time will tell.

I just got off the phone with the NMML higher ups, and I'm told I will receive what ever information exists (papers/data) on the role of Bristol Bay salmon to marine mammals by COB this week.

Have you put together a new time line?
